

COMBUSTION CHAMBER DYNAMIC PRESSURE TRANSDUCER TEE PROBE  
HOLDER AND RELATED METHOD

ABSTRACT OF THE DISCLOSURE

[0031] A dynamic pressure probe for a combustor comprising a holder body having a pressure sensing passage; a pressure sensor and a pressure chamber located in a housing portion arranged substantially perpendicularly to the pressure sensing passage; and wherein the pressure chamber communicates with the pressure sensing passage via a relatively small aperture in a wall separating the pressure chamber from the pressure sensing passage.
